### Office Action Summary

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-14 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The preamble of the claims stated that only the positioning system is being claimed, while positive limitation to the lateral sides of the opening, as set forth in claims 8, 14 and 19, suggests that a combination with the opening is being claimed, thus rendering the claims indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller. Miller shows a strut 30, a track (upright beam 18), a plate 19 and locking member (nuts and bolts securing the plate 19 to track/path 18, wherein the track/path having a plurality of landings (the holes for the nut and bolts).

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Sedlak et al. Sedlak shows a strut 40, a track 22, a plate 24 and locking member 56.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-11 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bye et al in view of Talukdar et al. Bye shows the claimed parts, a strut 48 and a strut connecting means at 52. Talukdar shows the claimed parts, a track 223, slide plate 231 and a pinion 265. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Bye with the claimed parts, as taught by Talukdar, which are capable of being used together.

Claims 12,13,19 and 20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation of claim 19 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

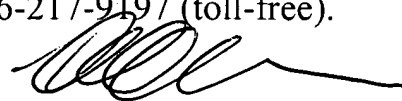

Applicant's election of group II in the reply filed on 11/4/04 is acknowledged. Because applicant did not distinctly and specifically point out the

supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
